

# Ed2.0Work

European network for the integration of  
**Web2.0** in education and work

## Invitation to engage with the Ed2.0Work project

r.e. SIG groups on using Web2.0 in Education and work

Ed.20Work is a European Union network education project that is designed to improve the use of Web2.0 tools in education and the world of work. It will also be looking for synergies between the two fields.

Web2.0 and Enterprise 2.0 present great opportunities and challenges for educators and employers. The potential for autonomous creativity, research, communication and sharing by all stakeholders is a unique and unparalleled opportunity.

Ed.20Work project has now reached the stage where stakeholders (see below), from education and the world of work, are invited to join our Special Interest Groups (SIGs) that will be opening up discussions on:

- Web2.0 and Internet resources – how do we evaluate these tools and their uses
- Learning and training pedagogies – how do we teach and train using Web2.0
- Curriculum including criteria for excellence and quality – how do we build curricula for Web2.0 or integrate Web2.0 into existing ones

Please follow this link <http://sigs.ed20work.eu> to a registration page where you can indicate your area or areas of interest.

Stakeholders can include education; administrators, teachers, associations, teacher trainers and university staff, from the world of teaching, training, work, chambers of commerce, associations and government.

We hope you will be able to contribute to the discussions.

Best regards

Professor Thomas M. Connolly  
University of the West of Scotland  
Ed2.0Work Project Coordinator
